ABDUL REHMAN

Senior DevOps / DevSecOps / Cloud Engineer

+92 303 9692131 abdulrehman.devops@gmail.com Islamabad, Pakistan abdulrehman.cz LinkedIn GitHub

PROFESSIONAL SUMMARY

Senior DevOps / DevSecOps / Cloud Engineer with **4+ years** of progressive experience from Linux systems administration to owning production cloud platforms. Runs multi-cloud infrastructure on **AWS, Microsoft Azure, and Google Cloud (GCP)** with **Kubernetes (Amazon EKS, Azure AKS, Google Kubernetes Engine)**, **Terraform**, and **GitOps (ArgoCD, FluxCD)**, scaled with **Karpenter, KEDA, and Istio**. Builds **shift-left security** into every pipeline (**SAST, DAST, SCA, container and IaC scanning, secrets detection**) and hardens clusters, edge, and IAM to least privilege. Delivers secure, highly available platforms for **AI/ML (GPU) workloads, SaaS products, and Web3/blockchain infrastructure**, and leads incident response and root-cause analysis for production systems.

CORE COMPETENCIES

Multi-Cloud Architecture (AWS, Azure, GCP) • Kubernetes Platform Engineering (EKS, AKS, GKE) • Infrastructure as Code (Terraform, Ansible) • GitOps & CI/CD • DevSecOps & Shift-Left Security • Cloud & Kubernetes Security Hardening • Autoscaling & Cost Optimization • Service Mesh (Istio) • Observability & SRE Practices • Incident Response & RCA • Blockchain / RPC Infrastructure

PROFESSIONAL EXPERIENCE

Senior DevOps / DevSecOps Engineer

01/2026 – Present

Funavry Technologies | Islamabad, Pakistan

- Architect and operate production **multi-cloud infrastructure on AWS, Azure, and GCP**, standardizing VPC/VNet design, **IAM** boundaries, and high-availability patterns across dev, staging, and production environments.
- Run production **Kubernetes** on **Amazon EKS, Azure AKS, and Google GKE**, owning cluster architecture, node pools, workload isolation, and resource right-sizing, with **Terraform** modules (remote state, **Checkov**-scanned) provisioning every environment.
- Engineer request-driven autoscaling with **KEDA** on **Istio/Prometheus** metrics and **Karpenter** node provisioning; root-caused failed scale-outs to a **conflicting HPA and an Istio sidecar metric bypass**, restoring reliable scaling for production frontends.
- Drive **GitOps** delivery with **ArgoCD and FluxCD**: every environment declared in Git with automated sync, drift detection, and fast rollbacks.
- Enforce **DevSecOps security gates** in **GitHub Actions and GitLab CI/CD**: **SAST** (Semgrep, SonarQube), **DAST** (OWASP ZAP), **SCA and image scanning** (Trivy), and **secrets detection** (Gitleaks), failing builds on critical findings before deployment.
- Harden clusters and edge with **Kubernetes RBAC**, **network policies**, admission/policy enforcement, **Istio mTLS** (Kiali for traffic visibility), centralized **secrets management**, and **Cloudflare WAF, rate limiting, and Turnstile**, validating capacity with **k6 load tests** in CI.
- Lead **incident response and root-cause analysis** for client production platforms, including **PostgreSQL connection exhaustion** and a **Cloudflare JS Challenge** misconfiguration, delivering permanent fixes and runbooks; perform application security assessments (**Burp Suite** penetration testing, mobile **SSL pinning** with AWS ACM).
- Operate distributed and hybrid **blockchain nodes** and load-balanced **RPC infrastructure** for high availability.

DevOps Engineer

03/2025 – 01/2026

IKONIC | Islamabad, Pakistan

- Provisioned production infrastructure across **AWS, Google Cloud (GCP), and DigitalOcean**: compute, networking, storage, load balancing, and supporting services.
- Operated **AWS EKS and Google GKE** clusters plus DigitalOcean container workloads, owning deployments, resource allocation, ingress, and service exposure.
- Deployed **Python/React AI applications**, including **GPU-enabled workloads**, in containerized environments sized for inference performance and cost.
- Developed **GitHub Actions CI/CD**: build, test, **security validation**, container image workflows, and promotion across dev, staging, and production.
- Containerized services with **Docker multi-stage builds**, publishing to **AWS ECR, Google Artifact Registry, and Docker Hub** with **image vulnerability scanning** in the pipeline.
- Improved reliability through cloud security, network hardening, **monitoring and alerting**, and performance tuning across all environments.

DevOps / DevSecOps Engineer

08/2023 – 03/2025

Forbmax | Islamabad, Pakistan

- Built and operated **Kubernetes** across cloud and an **on-premises data center**: cluster lifecycle, scheduling, networking, persistent storage, and access control.
- Implemented **GitOps** with **ArgoCD** for declarative deployments, release synchronization, and safe rollbacks.

- Engineered end-to-end **Jenkins** pipelines (Pipeline as Code) embedding **DevSecOps** gates: **SonarQube (SAST)**, **OWASP Dependency-Check (SCA)**, and **Trivy** container scanning before every deployment.
- Deployed workloads with **Docker and Helm** behind **NGINX and Traefik** ingress with automated **SSL/TLS** certificate management.
- Established **Prometheus and Grafana** monitoring and alerting, tuning resource limits and autoscaling.
- Automated server configuration and repeatable deployments with **Ansible** and Bash scripting.

Linux System Administrator
2022 – 2023

Onyx Tech | Lahore, Pakistan

- Administered enterprise **RHEL 7/8** servers: configuration, security patching, and package management with **YUM/RPM**.
- Managed storage with **LVM and RAID**, and supported **Apache, DNS, NFS, and FTP** services, routing, and **iptables** firewall policies.
- Hardened systems with **SELinux**, and set up monitoring, **backup, and recovery** procedures using rsync and standard Linux performance tooling.

TECHNICAL SKILLS

Cloud Platforms:	**AWS** (EC2, EKS, ECS, ECR, Lambda, S3, RDS, VPC, Route 53, ALB/NLB, CloudFront, IAM, KMS, Secrets Manager, CloudWatch, CloudTrail, WAF), **Azure** (AKS, VMs, VNet, ACR, Key Vault, Entra ID, App Gateway, Monitor), **GCP** (GKE, Compute Engine, Cloud Run, Cloud Storage, VPC, IAM, Artifact Registry, Cloud Logging & Monitoring), DigitalOcean, Hetzner, On-Premises
Kubernetes:	Amazon EKS, Azure AKS, Google GKE, On-Prem Clusters, Helm, Karpenter, KEDA, HPA, Istio, Kiali, Ingress NGINX, Traefik
DevSecOps:	SAST, DAST, SCA, Container & IaC Scanning, Secrets Scanning, SonarQube, Semgrep, Trivy, OWASP ZAP, OWASP Dependency-Check, Gitleaks, Checkov, Dependabot, Burp Suite
Cloud Security:	IAM/RBAC, Least Privilege, Secrets Management, KMS, Encryption at Rest & in Transit, mTLS, Network Policies, Security Groups/NSG, Cloudflare WAF & Turnstile, AWS WAF, SELinux
CI/CD & GitOps:	GitHub Actions, GitLab CI/CD, Jenkins, Azure DevOps Pipelines, ArgoCD, FluxCD
IaC & Config:	Terraform, Ansible, AWS CloudFormation
Containers:	Docker, Multi-stage Builds, Docker Compose, ECR, Artifact Registry, Docker Hub
Observability:	Prometheus, Grafana, ELK Stack, CloudWatch, Kiali, Uptime Kuma, k6 (Load Testing)
Data & Messaging:	PostgreSQL, Redis, Elasticsearch, Kafka
Linux & Networking:	RHEL, Ubuntu, LVM, RAID, DNS, NFS, TCP/IP, Load Balancing, iptables, Nginx, HAProxy
Programming:	Go, Python, Bash, Groovy (Jenkins), HCL, YAML, JSON, SQL
Web3:	Blockchain Node Operations, Distributed & Hybrid Node Deployment, RPC Infrastructure

CERTIFICATIONS & TRAINING

AWS Technical Essentials | **Amazon Web Services (AWS)** — **Oct 2025**

DevOps Course Certification | **Intellipaat** | Credential ID: 31679-1655-294125 — **Oct 2025**

Microsoft Azure Certification Course | **Intellipaat** | Credential ID: 31679-1786-294125 — **Oct 2025**

EDUCATION

Bachelor of Science in Computer Science
2018 – 2022

Riphah International University | Lahore, Pakistan

SPOKEN LANGUAGES

English (Professional Working Proficiency) • Urdu (Native)
